

Ramez Sameh

Full Stack .NET Developer

Cairo, Egypt

hello@ramez.dev

github.com/RamezSameh

ASP.NET Core + React Passionate about building scalable web applications with clean code and reliable system performance. I focus on turning complex systems into clear, dependable product experiences.

SELECTED PROJECTS

Sakan Talaba — Student Housing Platform

[ASP.NET Core 8](#) · [SQL Server](#) · [SignalR](#) · [JWT](#)

An end-to-end platform connecting students with suitable housing, featuring JWT authentication, real-time SignalR chat, Cloudinary uploads, and spatial recommendations.

[View repository](#) ↗

ECommerce.API

[ASP.NET Core](#) · [EF Core](#) · [Clean Architecture](#) · [AutoMapper](#)

A maintainable commerce API with strict separation across Core, Application, and Infrastructure layers.

[View repository](#) ↗

Bookify — Booking Management System

[ASP.NET MVC](#) · [Docker](#) · [Repository](#) · [Unit of Work](#)

A Docker-ready booking system structured with N-Tier architecture, Repository, and Unit of Work patterns.

[ASP.NET CORE WEB API](#) 92%

[REACT.JS / HOOKS / CONTEXT](#) 86%

[SQL SERVER / EF CORE](#) 88%

[DOCKER / DEPLOYMENT](#) 78%

[SIGNALR / JWT AUTH](#) 84%

[GIT / GITHUB](#) 92%

WORKING PRINCIPLES

Architecture with intent

Choose boundaries that keep the next feature easy to build.

Performance as a feature

Fast APIs, purposeful data access, and responsive interfaces.

Details that earn trust

Clear states and resilient interactions at every layer.

OPEN TO SELECT OPPORTUNITIES

Available for select full-stack, backend, and product engineering opportunities.
